

DigAlerts

KloudGin's DigAlert Solution allows organizations to manage DigAlert tickets effectively. It streamlines receiving, managing, and responding to DigAlert ticket notifications for operations and compliance.

Find DigAlert tickets and asset data on the GIS map.

Key Benefits

- ✓ **Enhance Efficiency**
 Boost efficiency in processes and operations with automation to reduce manual intervention and the possibility of errors.
- ✓ **Create Seamless Workflows**
 Create seamless workflows by integrating FSM, EAM, DigAlerts, Cross-Connection, and GIS into one unified platform. For example, your company's 811 tickets are incorporated and tracked as part of planning, scheduling, and completing complex underground work in KloudGin's Asset Management Suite.
- ✓ **Enhance Compliance**
 Ensure effective and efficient regulatory compliance with reporting, analytics, and custom integrations with 811 agencies.
- ✓ **Improve Decision-Making**
 Make better decisions with a geospatial perspective of DigAlerts, work orders, and assets on GIS maps. Intuitive, color-coded maps call attention to high-priority tickets for supervisors and locators to make informed decisions.

Key Values & Features

End-to-End Automation for 811 Systems

Automate the dispatch process to locators and send seamless live ticket status updates back to 811.

Complete GIS Map Ticket Visibility

Access [DigAlert](#) tickets on the [GIS map](#) alongside asset data with a geospatial perspective.

Mobile App with GIS and Offline Access

Obtain a unified view of assets, DigAlert tickets, and [As-Built](#) files on GIS maps on the mobile app while offline too. The solution allows geotagging of photos and annotations, facilitating efficient auditing.

Positive Acknowledgment to USA Locate

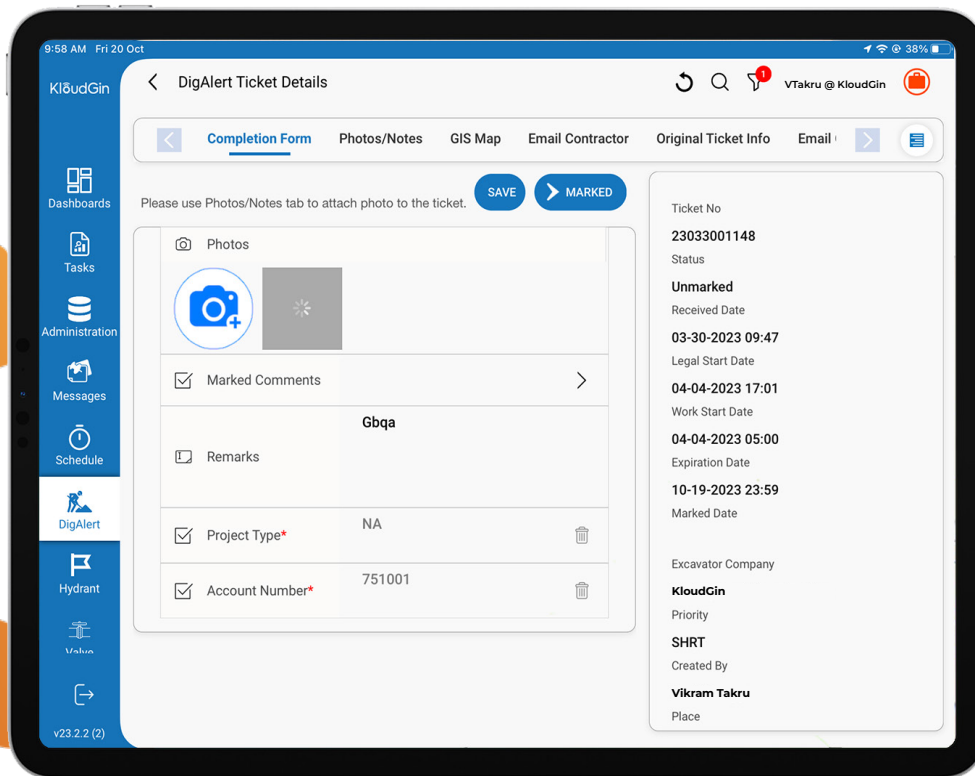

Auto-generate positive acknowledgments to USA Locate when DigAlert tickets are marked.

MICHAEL SALAS

FORMER SVP, CHIEF INFORMATION & DIGITAL OFFICER, VEOLIA

“In my 30 years’ experience with utilities, I’ve been looking for a single solution that combines asset management and worker and customer service management – and found it with KloudGin.”

Capture photos, comments and remarks in real time.

Key Values & Features

Compliance Reporting & Analytics

[Generate insightful reports](#) and analyze data to track compliance, identify trends, and make data-driven decisions. Ensure marking is completed within the required timeline based on ticket priority. Review marking history when facilities are uncovered or damaged. Be prepared with date, time, user, and geo-coded stamped data to protect your company if something goes wrong.

Integration with State Ticketing Agencies

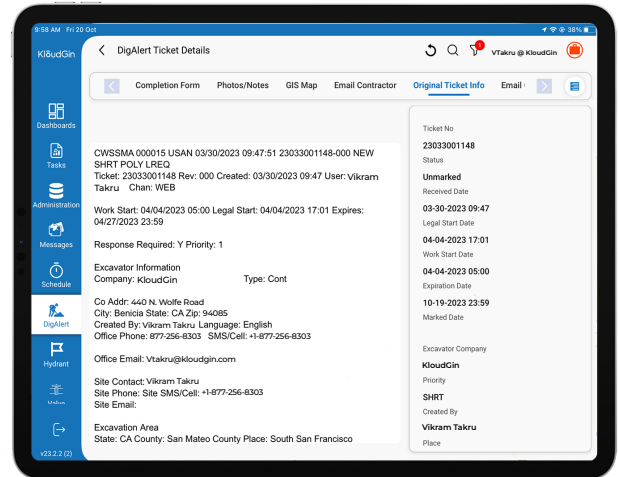

Never miss an 811 ticket with seamless integration with respective state 811 agencies. This ensures ticket information is automatically imported whether your region still relies on emailed tickets or supports web services.

Automated Response Updates

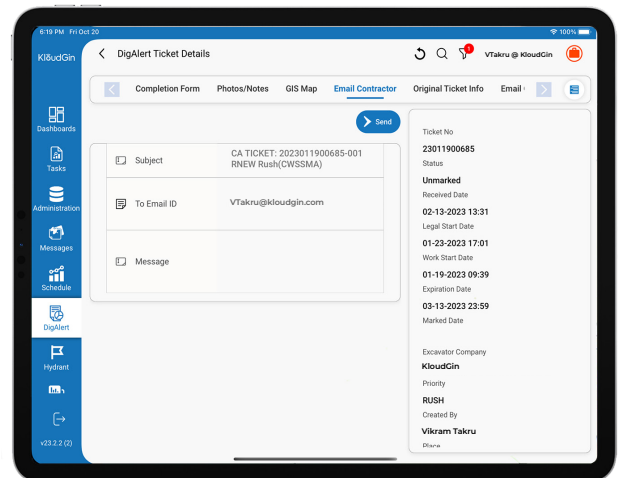

Streamline communication with automated responses for DigAlert tickets. Region-specific updates such as Marking In-Progress, Request for Information, Field Meet, No Conflict, and Marked are supported on KloudGin.

Contractor Communication

Empower users to [communicate directly with contractors](#) on the application. Emails are automatically logged for the respective tickets.

Access ticket details easily across state lines.

Simplify communication with contractors.

About KloudGin

KloudGin is the only cloud provider to combine Enterprise Asset & Field Service Management and AI-powered algorithms into a single solution which connects the back office, customers, mobile employees, and assets. Built for the workers who use it most, KloudGin eliminates traditional information and process silos to enable clients to unify systems, resources, and processes in real time so they can transform the customer experience and improve worker productivity.
